Advisory Action

Application No.	Applicant(s)	
09/751,993	KEMP ET AL	
Examiner	Art Unit	
Roberto J Rios	2836	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 20 October 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid appropriately fulfill and the applicant is required to avoid appropriately fulfill and the applicant is required to avoid appropriately fulfill and the applicant is required to avoid appropriately fulfill and the applicant is required to avoid appropriate fulfill and the applicant is required to avoid applicant is required to avoid applicant is required fin co

Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.
PERIOD FOR REPLY [check either a) or b)]
a) The period for reply expiresmonths from the mailing date of the final rejection.
b) \(\times\) The period for reply express on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later no event, however, will the statutory period for reply expire later than \$15X MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extensions for en variety of the did is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extensions fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2. The proposed amendment(s) will not be entered because:
(a) They raise new issues that would require further consideration and/or search (see NOTE below);
(b) ☐ they raise the issue of new matter (see Note below);
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(d) they present additional claims without canceling a corresponding number of finally rejected claims.
NOTE:
3. Applicant's reply has overcome the following rejection(s): See Continuation Sheet.
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5. The a) fidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because:
6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7. ☑ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
The status of the claim(s) is (or will be) as follows:
Claim(s) allowed: 4.8.9.11-13.16-18.21 and 22.
Claim(s) objected to: <u>7</u> .
Claim(s) rejected: <u>1-3.5.6.10,19,20 and 23-30</u> .
Claim(s) withdrawn from consideration:
8. ☐ The drawing correction filed on is a) ☐ approved or b) ☐ disapproved by the Examiner.
9. Note the attached Information Disclosure Statement(s)(PTO-1449) Paper No(s)
10. ☑ Other: See Continuation Sheet

Application No. 009/751.993

Continuation of 3. Applicant's reply has overcome the following rejection(s): 35 U.S.C. 102 and 103 rejections to claims 4, 8, 9, 11-16, 16 18, 21 and 22..

Continuation of 10. Other: Applicant's arguments regarding claims 4, 8, 21 and 22 are persuasive. However, applicant argues that Swartz does not disclose an input block to apply an input signal to a common input terminal of a sensing block. Applicant's Figure 2 shows sensing block (220) receiving at common input terminal (222) a voltage Vref2 defined in the specification as being the supply voltage, for example, 5 volts. Swartz discloses a positive operating voltage (same voltage needed to power the one show IMV (12) being supplied at a common node or terminal which is electrically coupled to the sensing block comprised of capacitors (2) and (5). Applicant also argues tha Swartz does not disclose a converting block that integrates a signal and provides first and second output signals and that notither of Swartz integrator is a converting block that integrates a signal and provide two output signals and that notither of Swartz integrator is a converting block to integrate a single sensed signal and provide two output signals therefrom. Applicant's Figure 2 shows an integrator unit (27) receiving at inputs (238) and (2411), 2 signals sensed by capacitors (2) and Ferspectively, wherein said integrator unit provides 2 signals at outputs (246) and (241), espectively to be compared. Swartz discloses an integrator unit receiving two signals from a sensing block comprised of capacitors (2) and (5), wherein said integrator unit provides 2 be compared. The comprised of capacitors (2) and (5), wherein said integrator unit provides 2 to expense of the comprised of capacitors (2) and (5), wherein said integrator unit provides 2 to it is that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See In re Keller, 642 F.24 413, 209 871 (CCPA 1881).
